○ abdalhababsah

PROFILE

Full stack developer specializing in Laravel, React.js, Vue.js, JavaScript, and jQuery. I build fast, responsive interfaces and solid backend systems using PHP and MySQL. At MENADevs, I develop and refine AI prompts to boost model performance. As an AWS Cloud Architect intern at ILINIX, I work with EC2, S3, and Lambda to build scalable cloud solutions. Previously, I led backend development at Orange Coding Academy, focusing on APIs, database tuning, and agile workflows. I move fast, write clean code, and solve real problems with practical, reliable solutions.

EDUCATION

bachelor degree in software engineering,   09/2020 – 01/2025 | Al-zarqa, jordan
Hashemite University with a Very Good grade

Back-End developer, orange coding academy   09/2023 – 12/2023 | Al-salt, jordan

PROFESSIONAL EXPERIENCE

Software Engineer ,AI prompt engineer, MENADevs   05/2024 – present | Amman, Jordan
• Developed and optimized AI prompts to improve performance and accuracy of large language models.
• Contributed to fine-tuning workflows on projects like "Code vs Code" and "Flamingo Multi-Turn Deviation" by analyzing model output and providing structured feedback.
• Built the frontend interface for an internal platform that manages model fine-tuning tasks, using **React.js**, **Tailwind CSS**, and **Axios** for interaction with backend APIs.
• Implemented features like user dashboards, task management views, prompt submission forms, and real-time status updates.
• Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, daily standups, and review sessions.
• Ensured frontend performance, usability, and responsive design across all user roles.

AWS Cloud Solution Architect Intern, Ilinix   03/2025 – present | Arizona, USA (Remotly)
Focused on studying AWS architecture principles and cloud best practices.Completed hands-on labs and training in core AWS services like EC2, S3, and Lambda.Explored cloud security, scalability, and cost optimization strategies.Built foundational knowledge in designing and managing AWS cloud solutions.

Back-End Developer, Orange Coding Academy   09/2023 – 12/2023 | Al-salt, jordan
Back-end development: Leveraged PHP and Laravel for robust functionalities.
Database optimization: Designed and fine-tuned SQL and MySQL databases.
API creation: Spearheaded API development to enhance system functionality and user experience.
Codebase maintenance: Ensured clean, organized code following coding standards and best practices.
Continuous learning: Stayed updated with industry trends and emerging technologies.
Agile leadership: Facilitated sprint planning, daily stand-ups, reviews, and retrospectives for streamlined workflows.

SKILLS

- React.js
- CSS3 | Tailwind CSS | Bootstrap 5
- MySQL | SQL
- Agile Methodology

- JavaScript
- PHP
- ORM (Eloquent)
- Git | GitHub

- jQuery
- Laravel
- AWS (EC2, S3, Lambda)
- Responsive Design

- HTML5
- RESTful API
- AI Prompt Design

PROJECTS

SECPHUB LMS
- Built **SECPHUB frontend** with **React.js** for an interactive learning platform
- Integrated **React Router** for dynamic routing and **Context API** for state management
- Created **reusable UI components** for courses and projects
- Designed **responsive layouts** using **Tailwind CSS**
- Added **real-time chat** functionality with **WebSockets**
- Implemented **JWT-based authentication** and API integration with **Axios**
- Delivered a **scalable, user-friendly interface** for students, instructors, and admins

Shantaty Bags Store ⧉
Developed an online store for Shantaty Bags using **Laravel**, **Vue.js,** and **Inertia.js**.
- Shopping Features: Users can add items to their cart and filter products by categories.
- **Admin Panel**: Administrators can manage users, products, colors, brands, images, and track orders.
- **Order Management**: Ability to print invoices and monitor order statuses.
- **User Dashboard**: Customers can view and check the status of their orders easily.
- **Host**: hosted on hostinger at the domain https://alhababsah.me ⧉

E-commerce Dashboard & Administration System
- Developed admin dashboard and e-commerce platform with product, brand, and inventory management
- Implemented SEO optimization, order processing, and customizable catalogs
- Supported category groups, categories, attribute groups, attributes, variant types, and tags
- Enabled order editing and bill printing features
- Integrated image storage with Amazon S3 for performance and reliability
- Technologies: **Laravel, jQuery, Yajra DataTables, MySQL, Amazon S3**

Multilingual Stone Display Platform (Arabic & English)
- Developed a multilingual stone display platform using Laravel for marble and stone sellers
- Built admin dashboard for dynamic content management
- Implemented dynamic **product display** with **variants**, **image sliders**, and **category** management
- Created full REST APIs for client-side integration
- Supported Arabic and English languages
- Technologies: **Laravel**, **jQuery**, **Yajra DataTables**, **MySQL**
